The terminal disclaimer filed on December 5, 2007 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent No. 6,358,543 has been reviewed and is accepted. The terminal disclaimer has been recorded.

It is noted that Applicant uses both "oxidizing" and "oxidising." For consistency, Applicant should use "oxidizing" throughout.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 13-19 and 28-53 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for hexose oxidase, does not reasonably provide enablement for all oxidoreductases. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims.

The specification only contemplates hexose oxidase as the oxidoreductase. No other oxidoreductases are taught.
